

The Practical Guide to Drafting Your Written Agreements Between Common-Law Couples

In Quebec, common-law couples have the option to create a written agreement, which serves as a legal document to define their rights and responsibilities. This agreement can address various aspects of their relationship, including property management, financial arrangements, and family duties.

This agreement can include provisions related to the division of expenses, ownership of property acquired during the common-law relationship, arrangements in the event of separation, etc.

It is important to note that this agreement does not have the same legal weight as marriage, but it serves as a tool to regulate the relationship within a common-law partnership.

Your Family Life
